

The Message to Millennials is Gaining Steam

As part of his ongoing campaign to teach millennials about the importance of saving even small amounts of money for their retirement over time, the *New York Post* picked up Mark Henry's message in their August 18th article by Gregory Bresiger.

As Social Security turned 83 on August 14th, many millennials are convinced they won't collect a cent by the time they retire.

Millennials — those born around the turn of the century — “face unique concerns for saving for retirement,” said Mark Henry, CEO of Alloy Wealth Management in Charlotte, NC.

Assuming the worst, millennials should “start saving on a regular basis as soon as you can. It doesn't have to be a lot at first, but do it every pay period. Be a tortoise. The tortoise is the one that wins,” Henry said.
